Professional Summary

Full Stack MERN Developer passionate about building efficient, scalable, and user-friendly web applications. Strong foundation in frontend and backend development, with expertise in modern JavaScript frameworks, REST APIs, and state management. Quick learner, problem solver, and collaborative team player delivering high-quality solutions in dynamic environments.

Education

Sahyadri College of Engineering and Management

2021 – 2025

- **Bachelor of Engineering (BE)** : Computer Science

Skills

Languages: C++ , JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frontend: React.js, Redux, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, Postman, VS Code, Burp Suite

Core Concepts: REST APIs, MVC Architecture, Secure Authentication, Responsive Design, State Management, Web Hosting & Deployment, Object-Oriented Programming (OOP), Data Structures & Algorithms

Experience

Web Application Development & Testing Intern, TorSecure Cyber LLP

Jan 2025 – May 2025

- Developed a real-time System Monitoring Dashboard using React/Next.js, FastAPI, and Tailwind CSS for live CPU, memory, and disk metrics.
- Integrated REST APIs and implemented CORS middleware for secure frontend-backend communication.
- Conducted testing and vulnerability assessment (XSS, CSRF, data exposure) using Burp Suite to ensure reliability and security.
- Collaborated on full-stack development tasks, improving system performance and responsiveness.

Projects

E-Commerce MERN Website – Full Stack Web Application

github.com/abhijithgithub23/E-commerce-Website

- Developed a full-stack e-commerce platform featuring product listing, shopping cart, checkout, and order management.
- Implemented secure authentication and authorization using JWT, with session handling and role-based access control, and optimized performance using Redis caching.
- Integrated Stripe for payment processing, Cloudinary for media uploads, and Recharts for analytics and visualizations.
- Tech Stack : React.js, Zustand, Node.js, Express.js, MongoDB, JWT, Redis, Stripe, Framer Motion, Tailwind CSS, Axios

Airbnb Clone – Full Stack Web Application (MVC)

github.com/abhijithgithub23/my-airbnb-clone

- Developed a server-rendered full-stack web application following MVC architecture to manage property listings, user authentication, reviews, and interactive maps.
- Implemented secure authentication and authorization using Passport.js, with session handling and role-based access control.
- Integrated Cloudinary for media management and Mapbox for interactive mapping features.
- Tech Stack : Node.js, Express.js, MongoDB , EJS, Passport.js, Cloudinary, Mapbox, Bootstrap 5

Weather App – Responsive Web Application (React.js)

github.com/abhijithgithub23/Weather-App

- Developed a dynamic weather application fetching real-time data from OpenWeatherMap API, displaying temperature, humidity, wind speed, UV index, and sunrise/sunset countdowns.
- Implemented advanced UI/UX features including glassmorphism cards, dynamic animated backgrounds based on weather and time, and professional insight panels for improved readability.
- Tech Stack : React.js, JavaScript (ES6+), CSS3 , Material-UI, OpenWeatherMap API
